Assignment 1 — Your Personal CV Page

Difficulty: Foundational · **Covers:** Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model)

· **Folder:** assignment-1/

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An “About Me” section.
- An “Education” section listing your academic history in a semantic list or table.
- A “Skills” section.
- A “Contact” section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not inline `style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Computer Science Undergraduate | Aspiring Full-Stack AI Engineer

SUMMARY

Research oriented CS undergraduate with hands-on experience in full- stack academic projects of startup nature and conducting data-driven research, tackling real world constraints and using multiple technologies to build and support the system. Familiar with scalable system design and API integration. Interested in backend development of AI systems and cloud based systems. Aspiring Full-Stack AI Engineer and AI systems architect, seeking to architect scalable system designs, develop end-to- end AI applications, and manage cloud deployment and production infrastructure.

    <h2>PROJECTS</h2>
    <hr>
    <ul>
        <li>2026 <strong>Technical Mandi:</strong> A full stack django api +
react frontend for a e-commerce site</li>
        <li>2026 <strong>FarmKhata:</strong> an android mobile app for tracking
and keeping record of farm, animals and dairy activities using sqLite3.</li>
        <li>2026 <strong>BadalGuard:</strong> Developed a python cloud security
expert system using forward chaining, JSON rules, NLP parsing and
certainty factor soring for cloud misconfiguration assessment.</li>
        <li>2026 <strong>Hikmat Markaz:</strong> centralised web-based database
platform using supabase for data storage and html, css and vanilla js
for frontend and python backend to address fragmented, manual, semi-digital medical
workflows in Pakistan</li>
        <li>2025 <strong>Zer-e-Aab:</strong> real time flood forecast, water's
spread prediction and administration system for Pakistan's government and
NGOs, using data scraper for data collection from official sites, geometrical
algorithms and libraries like mapsforge etc. for
prediction, spread and evacuation paths and priority-based logic for resource
distribution among camps.</li>
        <li>2025 <strong>NearNest:</strong> an android based, community powered,
restaurant explorer and order placing and managing application
with central data storage on MongoDB, initially to work only in Lahore</li>
        <li>2025 <strong>Thulla:</strong> an android based card game app</li>
        <li>2024 Console based <strong>Virtual classroom</strong> through local
file handling</li>
    </ul>
